Audited Financial Statements for the year ended December 31, 2023

Dear Valued Investor:

## A Profound, but Risky Pivot

Financial markets capped 2023 with an impressive fourth quarter, with wagers for a dovish monetary policy pivot and a soft economic landing sparking a profound rally across both stock and bond markets. The Federal Reserve gathering in December marked a pivotal policy shift towards easing, while some tentative signs of cooling inflation saw investors brace for aggressive rate cuts in 2024 and unleashed a bullish pulse across financial markets towards year-end.

The Federal Reserve's latest forecasts are calling for a so-called soft landing whereby inflation subsides without inflicting any major damage on the economy and allows for three rate cuts in 2024. However, this attempt to engineer the "goldilocks" not-too-hot, not-too-cold scenario could come with potentially dire consequences - particularly should premature rate cuts spark a second wave of inflation and a breakout in long-term inflation expectations. Cutting interest rates while the economy is operating above its potential and at a time when labour market conditions remain tight risks slowing or even reversing the disinflation process. Moreover, the subsequent easing in financial conditions may counteract what officials are ultimately trying to accomplish, with an unwelcome reacceleration in economic activity and pricing pressures inconsistent with the Fed's forecasts.

## Who we are...

With a national network of thousands of independent, professional advisors, ivari provides a full range of insurance products to help Canadians make the right choice for their protection needs. The people, products and service that make up ivari have stood the test of time and have been in the Canadian marketplace since 1928. We are committed to always being approachable and transparent in everything we do, and we will stand by our word. Visit us at ivari.ca.

We thank you for your business and look forward to continuing to help you reach your financial goals.

Sincerely yours,
Todr Laurence
Todd Lawrence
President and Chief Executive Officer

## Opinion

We have audited the financial statements of the Fund, which comprise the statements of financial position as at December 31, 2023 and the statements of comprehensive income, changes in net assets attributable to contractholders and cash flows for the year then ended, and notes to the financial statements, including material accounting policy information (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2023 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS").

## Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards ("Canadian GAAS"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Other Information

Management is responsible for the other information. The other information comprises the Management Report of Fund Performance.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We obtained the Management Report of Fund Performance prior to the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

## Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Management is responsible for overseeing the Fund's financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## Notes to Financial Statements

For the year ended December 31, 2023

## 1. General information

Growsafe 3 ("GS3") segregated funds, which consist of the funds listed below (collectively, the "Funds"), are separate investment accounts established by ivari ("the Manager"). The Funds and their assets are owned by the Manager and are segregated from the Manager's other assets. The Funds are not separate legal entities. The contract holder does not acquire any interest in them. The Funds invest in equity securities, investment grade debt securities, and units or shares of other investment funds to generate returns in the form of investment income and capital appreciation for the contract holders who are the ultimate beneficiaries of the Funds.

The Funds' registered office is at 200-5000 Yonge Street, Toronto, Ontario, M2N 7E9, Canada.
The Manager is the sponsor of the Funds and provides general management and administrative services required by the Funds in their day to day operations, including providing or arranging the provision of investment advice, establishing brokerage arrangements relating to the purchase and sale of the investment portfolio of the Funds, and bookkeeping, recordkeeping and other administrative and operational services for the Funds.

The Manager has selected Fiera Capital to provide investment advisory services to the Funds. Fiera Capital serves as the portfolio manager of the Funds. Also the Manager has selected RBC Investor Services as the custodian and administrator of the Funds.

The inception date of each Fund reported in these financial statements is as follows:

| Fund | Inception Date |
| :--- | ---: |
| ivari Canadian Short-Term Bond GIF | November 1993 |
| ivari CI Maximum Growth GIP | February 2001 |
| ivari Canadian Money Market GIF | February 2001 |

| ivari Global Growth GIF | October 2009 |
| ivari Quotential Growth GIF | October 2009 |
| ivari U.S. Equity Index GIF | October 2009 |

These annual financial statements were authorized for issue by the Manager effective April 4, 2024.

## 2. Basis of presentation

These annual financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS") as published by the International Accounting Standards Board ("IASB") and use the historical cost basis, except for financial assets and liabilities measured at fair value.

These financial statements are presented in Canadian dollars, the functional currency of the Funds, and all values are rounded to the nearest dollar except where otherwise indicated.

## 3. Summary of material accounting policies

## Financial instruments

The Funds recognize financial instruments at fair value upon initial recognition, plus transaction costs in the case of financial instruments measured at amortized cost. Purchases and sales of financial assets are recognized at their trade date. The Funds' investments are measured as Fair Value through profit or loss ("FVTPL"), including investments in debt securities which have been designated as FVTPL. The Funds' obligation for net assets attributable to contract holders ("NAAC") is presented at the redemption amount. All other financial assets and liabilities are measured at amortized cost.

Financial assets and liabilities are offset and the net amount presented in the statements of financial position when, and only when, the Funds have a legal right to offset the amounts and intend either to settle on a net basis or to realize the asset and settle the liability simultaneously.

## Notes to Financial Statements

For the year ended December 31, 2023

## Valuation of investments

Fair Value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair values of financial assets and liabilities traded in active markets (such as publicly traded marketable securities) are based on quoted market prices at the close of trading on the reporting date. The Funds use the closing bid prices for financial assets and closing ask prices for financial liabilities. The Funds' policy is to recognize transfers in and out of the fair value hierarchy levels as at the end of the reporting period for transfers between Level 1 and 2 and as at the date of the transfer for transfers in and out of Level 3.

The Canadian Life and Health Insurance Association ("CLHIA") requires the Net Asset Value ("NAV") of a segregated fund for contract holder transactions be based on fair value of the segregated fund's assets and liabilities, in accordance with the valuation rules set out in the Funds' information folder. The NAAC per unit and NAV per unit are disclosed in Note 9. The Funds have not changed their methodology with respect to calculating NAV.
The fair values of the investments on the schedule of investment portfolio, for reporting NAAC for financial reporting purposes and for calculating daily NAVs, are determined as follows:
a) Securities listed on a recognized public stock exchange are stated at their bid prices on the valuation date for reporting NAAC and at their close prices on the valuation date for determining daily NAV.
b) Securities not listed on a recognized public stock exchange are valued based upon available public quotations in common use or at prices estimated to be fair value as determined by the Manager of the applicable Fund.
c) Short term investments are stated at amortized cost which, given the short term nature of the investments, approximates fair value.
d) Bonds are stated at their bid prices on the valuation date for reporting NAAC. They are valued at the average of the closing bid and ask prices provided by recognized investment dealers on the valuation date for determining daily NAV. For both NAAC and NAV, unlisted convertible debentures are valued at cost, if the underlying security is less than the conversion price; or if the underlying security is greater than the conversion price, at the market value of the underlying security multiplied by the number of shares to be received.
e) Mutual fund units held are priced using the NAV per unit as of the valuation date of the particular fund.

## Financial assets and liabilities at FVTPL

The Funds' assets and liabilities are classified as FVTPL. Investments are classified based on both the Funds' business model for managing those assets and the contractual cash flow characteristics of the financial assets. The portfolios of financial assets are managed and evaluated on a fair value basis using an income and capital appreciation objective. The cash flows from the Funds' securities are only incidental to achieving the Funds business model's objective. During 2023 and 2022, the Funds' financial instruments were all designated as FVTPL.

## Investment transactions, income recognition and transaction cost

Investment transactions are recorded on the trade date which is the date on which the Fund commits to purchase or sell the investment. Interest income from interest bearing investments is recognized using the effective interest method. Dividend income from financial assets as FVTPL is recognized when the Funds' right to receive payments is established. Distributions from underlying funds are recorded on the distribution date. Realized gains and losses from investment transactions are calculated on an average cost basis. Unrealized gains and losses are determined using the difference between the fair value and average cost.
Transaction costs are costs incurred to acquire financial assets or liabilities. They include fees and commissions paid to agents, advisers, brokers and dealers. Transaction costs are included in the cost of investments purchased or are a reduction in the proceeds received on the sale of an investment. These costs are immediately recognized in profit or loss as an expense in the statements of comprehensive income.

## Receivable for investments sold / payable for investments purchased

Receivable for investments sold and payable for investments purchased represent investment transactions that have been contracted for but not yet settled or delivered on the statements of financial position date respectively.
These amounts are recognized initially at fair value and subsequently measured at amortized cost, less provisions for credit losses for amounts receivable for investments sold. A provision for credit loss is measured at an amount equal to 12-month expected credit loss at initial recognition, if the credit risk has increased significantly after initial recognition, a provision for credit losses equal to the lifetime expected credit losses will be established at each reporting date. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganization, and default in payments are considered indicators that a loss allowance may be required on the amount due from a specific broker. If the credit risk increases to the point that it is considered to be credit impaired, the Fund recognizes an impairment loss as the difference between the amortized cost of the financial asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. Impairment losses on financial assets at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized.

The Fund considers the probability of default close to zero and the counterparties have a strong capacity to meet their contractual obligations in the near term. Given the limited exposure of the Funds to credit risk, no loss allowance has been recognized as any such impairment would not have a significant impact on the financial statements.

## Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held on call with banks and bank overdrafts. Bank overdrafts are shown in current liabilities in the statements of financial position.

## Notes to Financial Statements

For the year ended December 31, 2023

## Other assets and liabilities

Dividend and interest receivable, subscriptions receivable, receivable for investments sold and other receivables are categorized as loans and receivables and recorded at cost or amortized cost. Management fees payable, redemptions payable, payable for investments purchased and other payable and accrued expenses are categorized as other liabilities and recorded at cost or amortized cost. Other assets and liabilities are short term in nature and cost or amortized cost approximates fair value.

## Translation of foreign currencies

a) The fair value of investments and other assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the prevailing rates on each valuation date.
b) Purchases and sales of investments, dividends and interest income denominated in foreign currencies are translated into Canadian dollars at the prevailing rates of exchange on the dates of the related transactions.
c) Foreign currency gains and losses resulting from translations are reported in the statements of comprehensive income. Foreign currency gains and losses relating to cash and cash equivalents are presented in the statements of comprehensive income within net foreign exchange gain or loss on cash and cash equivalents. Foreign currency gains and losses relating to financial assets and liabilities carried as FVTPL are presented in the statements of comprehensive income within net gain or loss on investments.

## Contract holder transactions

For each unit issued, the Funds receive an amount equal to the NAV per unit on the valuation date, which is included in NAAC. Units are redeemable at the option of the contract holder at their NAV per unit on the valuation date as determined in Note 7. For each unit redeemed, NAAC is reduced by the NAV of the unit on the redemption date.

## Increase (decrease) in net assets from operations attributable to contract holders

Income not distributed is included in NAAC. Movements in NAAC are recognized in the statements of changes in net assets attributable to contract holders.

Increase (decrease) in net assets from operations attributable to contract holders per daily average number of units in the statements of comprehensive income represents the increase (decrease) in NAAC, divided by the average daily number of units outstanding for each class of units.

## Unit valuation

A new NAV is calculated on every valuation date for each class of units. A valuation date is each day that the Manager is open for business and on which the Toronto Stock Exchange is open for trading. The NAV of a specific class of units is computed by calculating the value of the class's proportionate share of the assets and liabilities of the respective fund attributable only to that class. Expenses directly attributable to a class are charged directly to that class. Other expenses, income, and realized and unrealized capital gains and losses are allocated proportionately to each class based on the relative NAV of each class.

## Withholding taxes

The Funds may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income and gains are recorded on a gross basis and the related withholding taxes are shown separately in the statements of comprehensive income.

## Income and expense allocation

Where a Fund offers more than one class of units, realized gains (losses), changes in unrealized appreciation (depreciation) on investments, income and expenses that are common to the Fund as a whole are allocated daily to each class based on the proportionate share of the NAV of the class. The proportionate share of each class is determined by adding the current day's net contract holder transactions of the class to the prior day's NAV of the class. Any income or expense amounts that are unique to a particular class (for example, management fees) are accounted for separately in that particular class so as not to affect the NAV of the other classes.

## Hedging

The Funds will continue not to apply hedge accounting under IFRS 9.

## Critical accounting estimates and assumptions

The preparation of financial statements in compliance with IFRS requires management to exercise its judgment in applying its accounting policies and to make estimates and assumptions about the future. The most significant accounting judgments and estimates that the Funds have made in preparing the financial statements related to the fair values of some financial instruments are as follows:
a) The Funds may, from time to time, hold financial instruments that are not quoted in active markets. Fair values of such instruments are determined using valuation techniques and may be determined using reputable pricing sources (such as pricing agencies) or indicative prices from market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Where no market data is available, the Manager may value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. The models used to determine fair values are validated and periodically reviewed by experienced personnel of the Manager, independent of the party that created them. The models used for private equity securities are based mainly on earnings multiples adjusted for lack of marketability and control premiums. The model used for debt securities are based on net present value of estimated future cash flows, adjusted as appropriate for liquidity, and credit and market risk factors.

## Notes to Financial Statements

For the year ended December 31, 2023
b) Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require the Manager to make estimates. Changes in assumptions about these factors could affect the reported fair values of financial instruments.
c) The Manager considers observable data to be market data that is readily available, regularly distributed and updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Refer to Note 12 for further information about the fair value measurement of the Funds' financial instruments.

## Critical judgments

In classifying and measuring financial instruments held by the Funds, the Manager is required to make significant judgments about whether or not the business of the Funds is to invest on a total return basis for the purpose of applying the fair value option for the financial assets under IFRS 9, Financial Instruments. The most significant judgment made includes the determination that the fair value option can be applied to financial instruments and they are designated at FVTPL.

## 4. Charges for investment management and operating expenses

Each Fund class pays a management fee for the provision of fund management services. These services include investment advisory and portfolio management services, costs incurred to manage the Funds that are not directly related to a specific Fund such as overhead costs and, for some classes of the Funds, distribution related expenses. The daily management fee applicable to each Fund class and payable to the Manager is calculated on each valuation date and is equal to the product of the NAV of each Fund class on such date and the number of days lapsed since the last valuation date, multiplied by the Manager's effective daily management fee rate applicable to each Fund class.

In addition to the management fees payable, each Fund is accountable for its operating expenses, including applicable taxes. Operating expenses include audit fees, trustee and custodial expenses, accounting and record keeping costs, legal expenses, permitted prospectus preparation and filing expenses, bank related fees and interest charges, contract holder report costs, fund-related administration costs, and other day-to-day operating expenses. The Manager may, at its discretion, pay certain expenses of a Fund and/or may reimburse a Fund for expenses that it has paid.

Several of the expenses incurred by a Fund relate to services provided by third-party, non-affiliated entities. Examples of such services include audit, trustee, custodial, accounting, and banking services. These services are incurred directly by each Fund.

As well, a number of expenses paid by a Fund relate to services provided by the Manager. Such services include mail service, call center services, contract holder record keeping services, financial reporting and financial control services, as well as the Manager's indirect costs associated with the provision of these services. Indirect costs incurred by the Manager include costs associated with its premises, human resources and management oversight.
The costs of services provided by the Manager are allocated to each Fund proportionate to the time and effort required to support the Fund's day-today operations. The asset under management is included in determining an appropriate allocation of costs.

The Manager, at its discretion, may waive or absorb a portion of the operating expenses otherwise payable by a Fund class. These waivers may be terminated at any time by the Manager.

For details of the management expense ratio, refer to the unaudited financial information section.

## 5. Soft dollar brokerage commissions on securities transactions

Soft dollar brokerage commissions represent the value of payment in-kind provided to securities dealers for their services. There was no soft dollar compensation paid to brokerage firms for the years ended December 31, 2023 and December 31, 2022.

## 6. Brokerage commissions on securities transactions

A broker is an individual or party (brokerage firm) that arranges transactions between a buyer and a seller for a commission, typically paid when the transaction is executed. Brokerage commissions paid for the years ended December 31, 2023 and 2022 were as follows:

| Fund | 2023 | 2022 |
| :--- | ---: | ---: |
| ivari Canadian Balanced GIF | $\$ 3,933$ | $\$ 26,384$ |
| ivari Canadian Equity GIF | 5,236 | 27,811 |
| ivari Canadian Large Cap Index GIF | 46 | 90 |
| ivari Global Growth GIF | 1,010 | 597 |
| ivari U.S. Equity Index GIF | 229 | 169 |

## 7. Redemption of units

Contract holders may, on any valuation date, redeem all or any part of their units at the then current NAV per unit as follows:
a) Complete a redemption order along with all necessary supporting documentation ("redemption application") and send the redemption application to their dealer or broker who will forward it to the Manager; or
b) Place a wire order through a dealer or broker ("redemption request"). The same documents as described above must be provided in order to complete the redemption process.

## Notes to Financial Statements

For the year ended December 31, 2023

The NAV per unit is calculated on the same day if the redemption request or redemption application is received at or prior to 4:00 p.m. (ET). Payment for units redeemed will be made by the Funds within three business days from the date the redemption order is processed.

## 8. Redeemable units

The Funds issue single or multiple classes of redeemable units, which do not have identical rights. Such units are classified as financial liabilities. Each Fund is authorized to issue an unlimited number of units, which do not have any nominal or par value. Units can be redeemed to the Funds at any business date for cash equal to a proportionate unit of the Funds' NAV attributable to the unit class.

The units are entitled to participate in the notional distribution of the Funds, if any. If the contract holder redeems units, they are entitled to a proportionate share of NAV, represented by the Fund's NAV per unit. The relevant movements are shown in the statements of changes in net assets attributable to contract holders. The Funds' NAAC are managed according to the investment objectives of the Funds. To ensure the liquidity of the Fund, fund activity may involve the disposal of investments.

Units of a fund are issued and redeemed based on the Funds' NAVs per unit at the time of issue or redemption. The Fund's NAV per unit is calculated for each class by dividing the Fund's total NAV with the total number of outstanding redeemable units for each class.

The following chart summarizes, by Fund, redeemable unit transactions for the periods ended December 31, 2023.

| Fund | Class | Guarantee | Units outstanding, beginning of period | Units issued, including transfers-in and reinvested distributions | Units redeemed, including transfers-out | Units outstanding, end of period |

| ivari U.S. Equity Index GIF | 5,293 | 6,178 | 28 | 31 |

## 11. Financial risk management

## Risk Management

Each Fund's activities expose it to a variety of financial risks: market risk (including price risk, interest rate risk and currency risk), credit risk, liquidity risk and concentration risk.

The management of these risks is carried out by the Manager under policies approved by the Fund Management Review Committee. These policies provide written principles for overall risk management, as well as policies covering specific areas, such as foreign currency risk, interest rate risk, credit risk, the use of derivative financial instruments and non-derivative financial instruments, and the investment of excess liquidity.

The overall risk management program seeks to maximize the returns derived for the level of risk to which the Funds are exposed and minimize potential adverse effects from the unpredictability of financial markets on the Funds' financial performance.

All securities investments represent a risk of loss of capital. The maximum loss of capital on long equity and debt securities is limited to the fair value of those positions.

## Notes to Financial Statements

For the year ended December 31, 2023
The value of the investments may change due to one or more of the following investment risks:

## Price risk

Price risk arises from investments held by the Funds for which prices in the future are uncertain. The Funds invest in equity securities (also called stocks or shares) that expose the Funds to equity securities price risk. The market value, or price, of a stock is affected by developments at the investee company and by general economic and financial conditions in that company's industry and in the countries in which the investee company operates or is listed for trading on stock exchanges. General investor sentiment, as well as specific circumstances and events, may also impact the value of a stock.

The portfolio manager manages this risk through diversification and by a careful selection of securities and other financial instruments within specified limits. The maximum risk resulting from investments in financial instruments is the fair value of the securities and other financial instruments acquired by the Funds. The Funds' overall market positions are monitored daily by the Funds' portfolio manager or sub-advisor if applicable.

The Funds' returns are not perfectly correlated with the return of their benchmark, therefore, the percentage change in the value of the Funds will differ from that of their benchmarks.

As at December 31, 2023 had the benchmark of each of the following Funds increased or decreased by 3 percent, with all other variables held constant, the NAACs of those Funds would have increased or decreased by approximately the amounts shown in the table below.

| Fund | $\begin{gathered} \text { Equity } \\ \text { Exposure } \\ (000 \text { 's }) \\ \hline \end{gathered}$ | Benchmark | Impact on NAAC $(000$ 's $)$ | Impact on NAAC <br> (\%) |

## Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows. The Funds hold fixed income securities that expose the Funds to interest rate risk. An increase in prevailing interest rates will generally cause the value of fixed income securities to decline, while a decrease in such rates will generally cause the value of such securities to increase. Accordingly, the portion of a Fund that is invested in fixed income securities will reflect this inverse relationship between interest rates and the price of securities. In addition, the longer the time to maturity of a particular debt instrument held by a Fund, the greater price volatility it will have.
The portfolio manager manages this risk by measuring the mismatch of the interest rate sensitivity gap of financial assets and liabilities and calculating the average effective duration of the portfolio of fixed income securities. The average effective duration of each Fund's portfolio is a measure of the sensitivity of the fair value of the Fund's fixed income securities to changes in market interest rates.
The impact is calculated using the expected maturity date. The term to maturity is based on the contractual maturity date.
As at December 31, 2023, had market interest rates increased or decreased by 1 percent, with all other variables held constant, the NAAC of the following Funds would have decreased or increased by approximately the amounts shown in the table below.

| Fund | Term to Maturity |  |  | Total | Impact on NAAC |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Less than 1 year | 1-5 years | Greater than 5 years |  |  |  |
|  | (000's) | (000's) | (000's) | (000's) | (000's) | (\%) |
| ivari Canadian Short-Term Bond GIF | \$711 | \$2,403 | \$595 | \$3,709 | \$96 | 2.55 |

| ivari Canadian Balanced GIF | 3,096 | 4,651 | 9,911 | 17,658 | 1,152 | 3.80 |

## Foreign currency risk

Foreign currency risk arises as the value of future transactions, recognized monetary assets and liabilities denominated in other currencies than the Canadian dollar fluctuate due to changes in foreign exchange rates.
The Funds hold both monetary and non-monetary assets denominated in currencies other than the Canadian dollar and the related foreign currency exposure amounts are based on the fair value of the investments, cash balances, dividends and interest receivable, receivables for investments sold and payable for investments purchased that are denominated in foreign currencies. The Manager monitors the exposure on all foreign currency denominated assets and liabilities.

The value of these foreign currency holdings may be affected by changes in the value of the Canadian dollar compared to the value of these foreign currencies. For example, if the U.S. dollar rises relative to the Canadian dollar, the value of U.S. securities held in a Fund will be worth more in Canadian dollars. The inverse is also true - if the U.S. dollar falls, a Fund's U.S. holdings will be worth less in Canadian dollars.

As at December 31, 2023, had exchange rates increased or decreased by 10 percent, with all other variables held constant, the NAAC of the following Funds would have increased or decreased by approximately the amounts shown in the table below.

## Notes to Financial Statements

For the year ended December 31, 2023

| Fund | Foreign Currency Exposure <br> $(000 ' s)$ | Impact on NAAC <br> $(000 ' s)$ | Impact on NAAC <br> $(\%)$ |

## Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.
The main concentration to which the Funds are exposed arises from the Funds' investment in fixed income securities. A fixed income security issued by a company or a government contains a promise by the issuer to pay interest and repay a specified amount on the maturity date. Credit risk involves the risk that such a company will not live up to its obligations. If the credit quality of the issuer begins to deteriorate, it will lower the market value of the security, and vice-versa. The risk is lowest among companies that have received good credit ratings from recognized credit rating agencies. The risk is greater among companies that have a low credit rating or none at all.

To manage this risk, the Funds invest in fixed income securities that have a minimum credit rating of $\mathrm{BBB} / \mathrm{Baa}$ as designated by a well-known rating agency in keeping with the credit standards set out in the prospectus.

The Funds are also exposed to counterparty credit risk on cash and cash equivalents, receivable for investments sold and other receivable balances. The risk is managed by using reputable scheduled banks and brokers.

As at December 31, 2023, the following table outlines the amount and percentage of fixed income securities by credit rating held by each Fund.

| Fund | $\begin{gathered} \text { AAA } \\ (000 ’ s) \end{gathered}$ | \% | $\begin{gathered} \text { AA } \\ (000 \text { 's }) \end{gathered}$ | \% | $\begin{gathered} \mathrm{A} \\ (000 \text { 's }) \end{gathered}$ | \% | $\begin{gathered} \text { BBB } \\ (000 \text { 's }) \end{gathered}$ | \% | $\begin{gathered} \hline<\text { BBB } \\ \text { or } \\ \text { Unrated } \\ (000 \text { 's }) \\ \hline \end{gathered}$ | \% | $\begin{gathered} \text { Total } \\ (000 ’ s) \end{gathered}$ | $\begin{gathered} \text { Total } \\ \% \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ivari Canadian Short-Term Bond GIF | \$943 | 25 | \$72 | 2 | \$976 | 26 | \$1,523 | 42 | \$195 | 5 | 3,709 | 100 |
| ivari Canadian Money Market GIF | 7,392 | 65 | 4,010 | 35 | - | - | - | - | - | - | 11,402 | 100 |
| ivari Canadian Bond GIF | 2,884 | 15 | 3,282 | 17 | 5,510 | 28 | 7,694 | 38 | 303 | 2 | 19,673 | 100 |
| ivari Canadian Balanced GIF | 5,146 | 34 | 1,239 | 8 | 4,851 | 31 | 4,031 | 26 | 219 | 1 | 15,486 | 100 |

Certain Funds that invest in underlying mutual funds are exposed to indirect credit risk in the event that the underlying mutual funds invest in fixed income securities. As at December 31, 2022, the following table outlines the amount and percentage of fixed income securities by credit rating held by each Fund.

| Fund | $\begin{aligned} & \text { AAA } \\ & (000 \text { 's }) \end{aligned}$ | \% | $\begin{gathered} \text { AA } \\ (000 ’ \mathrm{~s}) \end{gathered}$ | \% | $\begin{gathered} \text { A } \\ (000 \text { 's }) \end{gathered}$ | \% | $\begin{gathered} \text { BBB } \\ (000 \text { 's }) \end{gathered}$ | \% | $\begin{gathered} <\text { BBB } \\ \text { or } \\ \text { Unrated } \\ (000 \text { 's }) \\ \hline \end{gathered}$ | \% | $\begin{aligned} & \text { Total } \\ & (000 \text { 's }) \end{aligned}$ | Total \% |

## Liquidity risk

Liquidity risk is the risk that the Funds may not be able to generate sufficient cash resources to settle their obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds are exposed to the daily cash redemptions of their redeemable units. Units are redeemable on demand at the then/current NAV per class unit.
The Funds' listed securities are considered readily realizable, as the majority are listed on the Toronto Stock Exchange. The Funds may invest in fixed income securities that are traded over the counter and unlisted equity investments that are not traded in an active market. As a result, the Funds may be unable to quickly liquidate their investments in these instruments at an amount close to their fair value to meet their liquidity requirements, or maybe unable to respond to specific events such as deterioration in the creditworthiness of any particular issuer.

## Notes to Financial Statements

For the year ended December 31, 2023
The Funds' policy to manage this risk is to invest the majority of their assets in investments that are traded in active markets and can be readily disposed of. In addition, each Fund retains sufficient cash and cash equivalents to maintain liquidity. The Manager monitors the Funds' liquidity position on a daily basis.

Certain Funds that invest in underlying mutual funds are exposed to indirect liquidity risk in the event that the underlying mutual funds invest in securities that cannot be readily converted to cash as needed.

The contractual maturity of the Funds' financial liabilities is less than three months.

## Concentration risk

Concentration risk arises from financial instruments that have similar characteristics and are affected similarly by changes in economic or other conditions. A summary of concentration of risks is disclosed in each Fund's schedule of investment portfolio.

## Capital risk management

Redeemable units issued and outstanding are considered to be the capital of the Funds. The Funds do not have any specific capital requirements on the subscription and redemption of the units, other than certain minimum subscription requirements. Contract holders are entitled to require payment of the NAV per unit of that Fund for all or any of the units of such holder of redeemable units by giving written notice to the Manager.

## 12. Fair value disclosure

The following describes the three levels of the fair value hierarchy for fair value measurements based on the transparency of inputs to the valuation for assets or liabilities as of the measurement date. The hierarchy provides the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are as follows:

Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Manager has the ability to access at the measurement date.

Level 2 Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly as prices or indirectly derived from prices.

Level 3 Inputs that are unobservable. There is little if any market activity. Inputs into the determination of fair value require significant management judgment or estimation.

If inputs of different levels are used to measure an asset's or liability's fair value, the classification within the hierarchy is based on the lowest level input that is significant to the fair value measurement.

Where there is a significant impact to the fair value estimate of Level 3 financial instruments in applying reasonable possible alternative assumptions, a range in fair value will be disclosed in the financial statements.

## Fair value hierarchy

The following fair value hierarchy table presents information about the Funds' assets measured at fair value as of December 31, 2023.

| Fund | $\begin{gathered} \hline \text { Level } 1 \\ (000 ' s) \\ \hline \end{gathered}$ | $\begin{gathered} \text { Level } 2 \\ (000 ’ s) \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { Level } 3 \\ (000 \text { 's }) \\ \hline \end{gathered}$ | $\begin{gathered} \text { Total } \\ (000 \text { 's }) \\ \hline \end{gathered}$ |

All fair value measurements are performed on a regular basis. The carrying value of cash and cash equivalents, receivable for investments sold, subscriptions receivable, interest receivable, dividends receivable, other receivables, payable for investments purchased, redemptions payable, management fees payable, other payable and accrued expenses and the Funds' obligation for NAAC approximate their fair values due to their short term nature. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1 and reclassified into Level 2 or Level 3, as appropriate.
a) Equities

The Fund's equity positions are classified as Level 1 when the security is actively traded and a reliable price is observable. Certain of the Funds' equities do not trade frequently and therefore observable prices may not be available. In such cases, fair value is determined using observable market data (e.g., transactions for similar securities of the same issuer) and the fair value is classified as Level 2, unless the determination of fair value requires significant unobservable data, in which case the measurement is classified as Level 3.
b) Bonds and short term investments

Bonds include primarily government and corporate bonds, which are valued at the mean of bid/ask prices provided by recognized investment dealers for NAV purposes and at bid price for NAAC. Unlisted convertible debentures are valued at cost, if the underlying security is less than the conversion price; or if the underlying security is greater than the conversion price, at the intrinsic or market value less conversion cost of the underlying security multiplied by the number of shares to be received. Short term notes and treasury bills are stated at amortized cost, which approximates fair market value. The inputs that are significant to valuation are generally observable and therefore the Funds' bonds and short term investments have been classified as Level 2 unless the determination of inputs to the fair value requires significant unobservable data in which case the measurement is classified as Level 3.

## Movements between Level 1 and Level 2 financial instruments

There were no transfers between Level 1 and 2 for the periods ended December 31, 2023 and December 31, 2022.

## Valuation of Level 3 financial instruments

a) Corporate bonds

Valuations of corporate bonds are performed daily. Valuations are determined by applying yield and spread to quoted price by broker or dealer.
b) Mortgage backed securities

Valuations of mortgage-backed securities are performed daily. Valuations are determined by applying yield and spread to quoted price by broker or dealer.

## Notes to Financial Statements

For the year ended December 31, 2023
c) Equity securities

Valuations of equity securities are performed daily. Valuations are based on manager assumption.
The chart below provides information about the valuation techniques and resulting fair values used for Level 3 financial instruments as at December 31, 2023 and December 31, 2022.

|  | December 31, 2023 |  | December 31, 2022 |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Valuation Technique | Fair Value <br> $(000 ' s)$ | Valuation Technique | Fair Value <br> $(000$ 's $)$ |
| Corporate bonds | Broker quotes with manager assumption | $\$-$ | Broker quotes with manager assumption | $\$ 184$ |
| Mortgage-backed securities | Broker quotes with manager assumption | - | Broker quotes with manager assumption | - |
| Equity | Manager assumption | - | Manager assumption | - |

## 13. Investments in underlying funds

Certain of the Funds invest substantially all of their assets in redeemable units of other investment funds ("Underlying Funds") to gain exposure to the investment objective and strategies of the Underlying Fund.

Each Underlying Fund invests in a portfolio of assets to generate returns in the form of investment income and capital appreciation for its unitholders. Each Underlying Fund finances its operations primarily through the issuance of redeemable units, which are puttable at the unitholder's option and entitle the unitholder to a proportionate share of the Underlying Fund's net assets. The respective Fund's interests in Underlying Funds, held in the form of redeemable units, are reported at fair value in financial assets at fair value through profit or loss in the statements of financial position and in their schedule of investment portfolio. The Funds' maximum exposures to financial loss relating to these investments are their invested amounts. Distributions earned from Underlying Funds are included in net gain or loss on investments in the statements of comprehensive income. The Funds do not provide additional significant financial or other support to the Underlying Funds.

## 14. Income taxes

The Funds are deemed to be inter-vivo trusts under the provisions of the Income Tax Act (Canada). Taxable income earned by the trusts is deemed to be payable to the contract holders and therefore deductible by the trusts. In addition, capital gains or capital losses from the disposition of any property are deemed to have been realized by contract holders directly and not by the trusts. As a result, no provision for income taxes is required in the financial statements of the Funds.

## Notes to Financial Statements

For the year ended December 31, 2023

Any non-capital losses arising in taxation years that begin after 2017 may be carried forward to reduce future taxable income, subject to the applicable restrictions of non-capital losses under the Act, until their expiry dates. The details by fund as at December 31, 2023 are shown below.

| Management expense ratio ${ }^{(2)}$ before waivers | 1.62 | 2.36 | 1.83 | 1.76 | 1.75 |

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100.
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

| Net Assets attributable to contractholders (000's) | \$6,288 | \$7,161 | \$9,816 | \$10,331 | \$12,283 |
| Number of units outstanding ${ }^{(1)}$ | 380,445 | 458,116 | 551,666 | 612,112 | 766,664 |
| Management expense ratio ${ }^{(2)}$ | 3.59 | 3.53 | 3.51 | 3.48 | 3.43 |
| Management expense ratio ${ }^{(2)}$ before waivers | 3.74 | 3.57 | 3.51 | 3.48 | 3.55 |
| Portfolio turnover rate ${ }^{(3)}$ | 3.64 | 3.66 | 10.33 | 7.30 | 8.45 |

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.
(5) The 2020 before waiver was restated to ensure a consistent approach with prior years.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past 5 years.

| Net Asset Value per unit | $2023{ }^{4}$ | $2022{ }^{4}$ | $2021{ }^{4}$ | $2020{ }^{4}$ | $2019{ }^{4}$ |
| Net Asset Value per unit as of December $31{ }^{\text {st }}$ of the year shown ${ }^{(1)}$ | \$14.81 | \$14.16 | \$15.81 | \$14.79 | \$14.53 |
| Ratios and Supplemental Data |  |  |  |  |  |
| Net Assets attributable to contractholders (000's) | \$2,596 | \$2,892 | \$4,092 | \$4,669 | \$5,779 |
| Number of units outstanding ${ }^{(1)}$ | 175,342 | 204,180 | 258,815 | 315,690 | 397,653 |
| Management expense ratio ${ }^{(2)}$ | 3.51 | 3.51 | 3.51 | 3.46 | 3.42 |
| Management expense ratio ${ }^{(2)}$ before waivers | 3.74 | 3.58 | 3.51 | 3.47 | 3.53 |
| Portfolio turnover rate ${ }^{(3)}$ | 5.87 | 5.79 | 5.31 | 22.24 | 5.95 |

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## FINANCIAL HIGHLIGHTS (UNAUDITED)

| Portfolio turnover rate ${ }^{(3)}$ | 1.41 | 4.28 | 3.66 | 52.12 | 2.27 |

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

| Portfolio turnover rate ${ }^{(3)}$ | - | - | - | - | 0.73 |

(1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
(2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
(3) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of $100 \%$ is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains (losses) in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
(4) This Information is provided as at December 31 of the year shown.

## SCHEDULE A (UNAUDITED)

The GROWSafe, GROWSafe 2, GROWSafe 3, imaxxGIF ${ }^{\mathrm{TM}}$, Five for Life ${ }^{\mathrm{TM}}$, and ivari Guaranteed Investment Funds, ("the Funds") Third Party Underlying Fund Holdings
The GROWSafe (GS) GROWSafe 2 (GS2), GROWSafe 3(GS3) ,imaxxGIF ${ }^{T M}$, Five for Life ${ }^{\mathrm{TM}}$ (5FL) and ivari Guaranteed Investment Funds (ivari GIF) (collectively "the Funds") contracts contain segregated funds that invest in a single third party underlying mutual fund (ivari Alliance Guaranteed Investment Funds) as well as segregated funds that invest in multiple third party underlying mutual funds (GIPs).

The following outlines key information about the Funds' third party underlying investment holdings and is intended to help you understand the Funds' third party investment porffolio. This information is derived from information provided by ivari's third party mutual fund providers and is unaudited.

For each GIP listed below, the top 5 holdings of each underlying fund is outlined. For each ivari Alliance Guaranteed Investment Fund and listed below, the top 25 holdings of the underlying fund is outlined. All investments are as of December 31, 2023.

Funds are listed in the following order of appearance:

The Fund is not sponsored, endorsed, sold or promoted by NASDAQ, Inc. or its affiliates (NASDAQ, with its affiliates, are referred to as the "Corporations"). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Fund. The Corporations make no representation or warranty, express or implied to the unitholders of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly, or the ability of the NASDAQ-100 Index ${ }^{\circledR}$ to track general stock market performance. The Corporations' only relationship to ivari ("Licensee") is in the licensing of the Nasdaq ${ }^{\circledR}$ and NASDAQ-100 Index ${ }^{\circledR}$ marks, and certain trade names of the Corporations and the use of the NASDAQ-100 Index ${ }^{\circledR}$ which is determined, composed and calculated by NASDAQ without regard to ivari or the Fund. NASDAQ has no obligation to take the needs of ivari or the unitholders of the Fund into consideration in determining, composing or calculating the NASDAQ-100 Index ${ }^{\circledR}$. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Fund's units to be issued or in the determination or calculation of the equation by which the Fund's units are to be converted into cash. The Corporations have no liability in connection with the administration, marketing or offering of the Fund. THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF THE NASDAQ-100 INDEX® OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY ivari, UNITHOLDERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ-100 INDEX® OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ-100 INDEX® OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

[^0]:    ** Numbers shown are zero when rounded to thousands.

[^1]:    (1) This information is derived from the Fund's audited annual financial statements. The Net assets attributable to contractholders per unit presented in the financial statements differs from the net asset value per unit calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
    (2) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. It is calculated by dividing the total operating expenses (excluding commissions, transaction costs) and management fees including applicable taxes, by the average net asset value of the fund for the financial period, then multiplying the result by 100 .
